

How to Create an Account on the VergeCloud Panel

Welcome to VergeCloud! Follow this step-by-step guide to set up your VergeCloud account, add your domain, choose a plan, and complete your first order.

Step-by-Step Guide

1. Go to the VergeCloud Panel

Navigate to <https://panel.vergecloud.com> in your browser.

2. Click on “Sign Up”

On the login screen, click “**Sign Up**” to begin creating your account.

3. Enter Your Email

Provide a valid email address you’d like to use for your VergeCloud account.

Create Your Account

Sign Up to access VergeCloud.

OR

Continue with Google

4. Choose How You Want to Secure Your Account

You'll be given two options:

- **Create a passkey** (recommended for password less login)
- **Continue without passkeys** (you'll create a traditional password)

Choose your preferred method.

Create a passkey for VergeCloud on this device

No need to remember a password

With passkeys, you can use things like your fingerprint or face to login.

Works on all of your devices

Passkeys will automatically be available across your synced devices.

Keep your account safer

Passkeys offer state-of-the-art phishing resistance.

Create a passkey

[Continue without passkeys](#)

[Go back](#)

5. Set a Password

If you choose to skip passkeys, you'll be prompted to create a secure password.

6. Verify Your Email

Check your inbox for a verification email from VergeCloud and click the link inside to confirm your email address.

Can't find the email?

Check your spam/junk folder or click "**Resend Verification**" on the panel.

7. Add Your First Domain

After verifying your email, you'll be prompted to add your domain name. This is the first step in setting up your CDN configuration. You will have two options:

1. **NS Delegation** – Update the nameservers provided by VergeCloud on your domain registrar. VergeCloud will then act as the authoritative DNS server.
2. **CNAME Setup** – Add the CNAME record provided by VergeCloud on your domain registrar. In this case, DNS remains under your control.

Add New Domain ⓘ

Traffic transfer way

ⓘ You're registering a subdomain (e.g., example.), which includes an additional fee. You can connect the subdomain using NS delegation or CNAME setup. NS delegation gives full DNS control. CNAME setup is easier and ideal if you only want to use VergeCloud's CDN features.

☐ NS Delegation

You must add Vergecloud compatible NS records for this domain in your primary DNS server. The process of getting the HTTPS certificate for this domain will use DNS-01 challenge

☐ CNAME Setup

You must add Vergecloud compatible CNAME records for this subdomain in your primary DNS server. The process of getting the HTTPS certificate for this subdomain will use HTTP-01 challenge
